<b>Water Resources</b>	<b>Agriculture/Wildlife</b>	

## Teacher Workshop Information

Each of the three days will be devoted to Water, Forestry, Agriculture and Local History and Culture. The classes will be taught by resource professionals (hydrologists, foresters, agronomists, producers, historians) using hands-on, grade-appropriate lessons that you can use to teach your students about natural resource management. You will spend time in the classroom as well as out in the field seeing first hand the management techniques that you have studied during classes.

Credit: Earn 17 ESD 123 clock hours. Information about registering for clock hours will be included in your confirmation packet. Clock hour fees are separate and the responsibility of the registrant.
